

ANDRE ROWE

Endpoint Engineer | Windows 11 Migration, Windows Autopilot, Endpoint Validation | Healthcare

Brooklyn, NY (open to relocation) | 516-968-1816 | rowea190@gmail.com

andrerowe.com | linkedin.com/in/rowecreates | github.com/andre-rowe

PROFILE

Service Desk Analyst on a 1,000-endpoint Windows 11 migration program across 9 NYU Langone Health sites, driven by Windows 10 end of support. Provisioned devices with Windows Autopilot, worked within an Intune- and Entra ID-managed endpoint environment with BitLocker-enabled endpoints, and validated every device before handoff. Personally staged 30+ devices a day, completed 10 to 15 on-site swaps a day on clinical units and handled approximately 65 ServiceNow cases a week in a HIPAA-regulated hospital system. Before IT: 24/7 healthcare operations and emergency dispatch.

1,000-endpoint program, 9 sites | 30+ staged a day | 10 to 15 swaps a day | Approx. 65 cases a week | Asked to join a 2nd NYU team

PROFESSIONAL EXPERIENCE

NYU Langone Health (contract via TEKsystems) | Service Desk Analyst | New York, NY

Jun 2025 to Aug 2025

Case study: Windows 10 end-of-support migration

Problem: Windows 10 end of support (October 14, 2025) would leave hospital endpoints without security patches.

Environment: HIPAA-regulated academic health system; clinical endpoint deployment across hospital, outpatient and specialty sites in Manhattan and Brooklyn.

Scale: Program scope: a 1,000-endpoint Windows 11 migration program across 9 sites, including Tisch Hospital, NYU Langone Orthopedic Hospital, One Park Avenue and NYU Langone Hospital, Brooklyn.

Individual volume: Staged 30+ devices a day and completed 10 to 15 on-site swaps a day on clinical units; handled approximately 65 ServiceNow cases a week.

Contribution:

- Provisioned devices with Windows Autopilot in the staging room, taking each through out-of-box experience, Autopilot profile and Enrollment Status Page as part of a high-volume rollout.
- Used Intune and Entra ID as part of the Windows 11 deployment workflow and worked with BitLocker-enabled endpoints, operating inside a Microsoft-managed endpoint environment.
- Validated each endpoint before handoff: user sign-in, mapped drives, printers and required departmental applications.
- Deployed clinical endpoints on site, timing swaps to avoid patient care and confirming Wyse thin-client stations still connected.
- Coordinated Windows 11 migrations that could be completed remotely, alongside staging-room and on-site work.
- Handled Active Directory account unlocks, password resets and group membership changes during post-deployment support, confirmed each user could work, and kept patient data out of ServiceNow case notes.

Technologies: Windows 11, Windows Autopilot, Intune and Entra ID (used in the deployment workflow), BitLocker-enabled endpoints, Active Directory, ServiceNow, Wyse thin clients.

Outcome: Completed my assignment through its scheduled end. Before it ended, a manager on another NYU Langone team asked me to join his team on a new contract.

DocGo | Field Supervisor, Medical Transport Operations | New York, NY

Aug 2023 to Mar 2025

- Supervised crews from a rotating roster of 60+ staff in a 24/7 medical transport operation running about 60 to 80 crews per shift.
- Owned scheduling, dispatch coordination and escalations.

Assist Ambulance | Emergency Logistics and Dispatch | New York, NY

Jul 2022 to Aug 2023

- Dispatched crews for time-critical calls under established protocols.
- Prioritized by urgency from incomplete caller and facility information.

Earlier: 911 Call Taker, Houston Emergency Center; Emergency Medical Technician. The through-line is triage: deciding quickly, from partial information, what gets escalated.

SKILLS AND EVIDENCE

Windows 11 migration: 30+ devices staged a day and 10 to 15 on-site swaps a day within a 1,000-endpoint, 9-site program; coordinated Windows 11 migrations that could be completed remotely [Work: Windows 11 case study]

Windows Autopilot provisioning: out-of-box experience, Autopilot profile, Enrollment Status Page [Work: case study workflow]

Microsoft-managed endpoint environment: used Intune and Entra ID in the deployment workflow; BitLocker-enabled endpoints [Work: Windows 11 case study]

Endpoint validation before handoff: sign-in, mapped drives, printers, departmental applications [Work: reconstructed checklist]

Active Directory: account unlocks, password resets and group membership changes [Work: Windows 11 case study]

ServiceNow: approximately 65 cases a week; no patient data in notes [Work: Windows 11 case study]

Clinical endpoint deployment: swaps timed to avoid patient care; Wyse thin-client stations confirmed connecting [Work: Windows 11 case study]

Regulated healthcare: HIPAA-regulated hospital, outpatient and specialty sites [Work: Windows 11 case study]

Cloud and code: Azure Functions, Cosmos DB, Python, MongoDB [Project, Course: Bayou Alert; CS-340]

Languages: Python, Java, C++, JavaScript (course and project work)

PROJECTS

Bayou Alert: flood-warning monitoring dashboard | Independent project | Azure Functions, Cosmos DB, React, Mapbox

Owned the backend and cloud architecture: a scheduled Azure Function pulls live USGS flood-sensor data into Cosmos DB, and a React and Mapbox dashboard shows severity-graded alerts across Houston's bayou network. Evidence: anderowe.com/bayou-alert.html

EDUCATION

M.S. Cybersecurity and Information Assurance | Western Governors University *In progress (started Oct 2026), expected 2027*
CompTIA CySA+ and PenTest+: in progress (WGU M.S. program).

B.S. Computer Science | Southern New Hampshire University 2026

- **CS-300 Data Structures and Algorithms (A):** C++ binary search tree course planner with a two-pass CSV loader. Evidence: github.com/andre-rowe/CS300-Portfolio
- **CS-340 Client/Server Development (A-):** Python CRUD module over 5,000+ MongoDB records with a dashboard. Evidence: anderowe.com/grazioso-animal-rescue.html
- **CS-499 Capstone:** Modernized a Java application into a Django web application with user authentication.

RECOMMENDATIONS

"His pseudocode was organized into clear, readable sections that covered every requirement, his C++ code was well commented, and his approach to choosing the right algorithms and data structures was sound."

Dr. Sherri Maciosek, Information Systems Adjunct Faculty, SNHU (CS-300 instructor)

"Andre was always a great student to work with, and his follow-through with suggestions or advice was outstanding. Communication is such a key skill in today's world, and Andre excels at it."

Darren Brown, Academic Advisor, Southern New Hampshire University

"His ideas simplified the experience for the users while hitting all the business goals."

Ruhee Charania, Product Designer II, SpotHero (Pitch teammate, 2022)
