

ANDRE ROWE

GRC Analyst | Risk, Compliance and Documentation in HIPAA-Regulated Healthcare

Brooklyn, NY (open to relocation) | 516-968-1816 | rowea190@gmail.com

andrerowe.com | linkedin.com/in/rowecreates | github.com/andre-rowe

PROFILE

Healthcare IT and operations background in HIPAA-regulated settings. Worked inside a 1,000-endpoint Windows 11 migration program across 9 hospital and clinic sites, driven by a dated risk (Windows 10 end of support), following a six-step per-device process with no patient data in case notes. Earlier: protocol-driven 911 and emergency dispatch, and stakeholder research. M.S. Cybersecurity and Information Assurance in progress.

HIPAA-regulated hospital | **End-of-support risk** | **1,000-endpoint program, 9 sites** | **Six-step per-device process** | **WGU M.S. in progress**

PROFESSIONAL EXPERIENCE

NYU Langone Health (contract via TEKsystems) | Service Desk Analyst | New York, NY Jun 2025 to Aug 2025

Case study: Windows 10 end-of-support migration

Problem: Windows 10 end of support (October 14, 2025) would leave hospital endpoints without security patches.

Environment: HIPAA-regulated academic health system; clinical endpoint deployment across hospital, outpatient and specialty sites in Manhattan and Brooklyn.

Scale: Program scope: a 1,000-endpoint Windows 11 migration program across 9 sites, including Tisch Hospital, NYU Langone Orthopedic Hospital, One Park Avenue and NYU Langone Hospital, Brooklyn.

Individual volume: Staged 30+ devices a day and completed 10 to 15 on-site swaps a day on clinical units; handled approximately 65 ServiceNow cases a week.

Contribution:

- Worked the hands-on side of a dated risk: Windows 10 end of support on October 14, 2025, which would leave endpoints in a HIPAA-regulated hospital system without security patches.
- Followed a six-step process for each device (prep, stage, validate, deploy on site, user readiness, post-deployment support), with ServiceNow close-out notes that contained no patient data.
- Completed on-site swaps at times that avoid patient care and validated sign-in, mapped drives, printers and departmental applications before handoff on BitLocker-enabled endpoints.

Technologies: Windows 11, Windows Autopilot, Intune and Entra ID (used in the deployment workflow), BitLocker-enabled endpoints, Active Directory, ServiceNow, Wyse thin clients.

Outcome: Completed my assignment through its scheduled end. Before it ended, a manager on another NYU Langone team asked me to join his team on a new contract.

Evidence: andrerowe.com/windows11-migration.html (workflow diagram and reconstructed per-device checklist, fictional data)

DocGo | Field Supervisor, Medical Transport Operations | New York, NY Aug 2023 to Mar 2025

- Supervised crews from a rotating roster of 60+ staff in a 24/7 medical transport operation running about 60 to 80 crews per shift.
- Owned scheduling, dispatch coordination and escalations.

Assist Ambulance | Emergency Logistics and Dispatch | New York, NY Jul 2022 to Aug 2023

- Dispatched crews for time-critical calls under established protocols.
- Prioritized by urgency from incomplete caller and facility information.

Pitch (seed-stage startup) | Product Manager, UX Research and Design (Contract) | New York, NY Mar 2022 to Dec 2022

- Ran screener surveys, moderated interviews and usability testing that shaped product decisions.

Earlier: 911 Call Taker, Houston Emergency Center; Emergency Medical Technician. The through-line is triage: deciding quickly, from partial information, what gets escalated.

SKILLS AND EVIDENCE

HIPAA-regulated environment: daily work in clinical areas; no patient data in case notes *[Work: Windows 11 case study]*

End-of-support risk: Windows 10 end of support as the driver of a 1,000-endpoint program *[Work: Windows 11 case study]*

Process and documentation: six-step per-device process; documented close-out in ServiceNow *[Work: reconstructed checklist]*

Endpoint controls: BitLocker-enabled endpoints in an Intune- and Entra ID-managed environment *[Work: Windows 11 case study]*

Stakeholder research: screeners, moderated interviews, usability testing *[Work, Project: Pitch; Loql]*

Analysis and recommendations: image compression analysis and recommendation report *[Course MAT-350]*

Protocol-driven operations: 911 call taking and emergency dispatch under established protocols *[Work: employment history]*

Languages: Python, Java (course work)

PROJECTS

Loql: stakeholder research | *Academic project, General Assembly UX capstone*
82-response screener and 5 moderated interviews to understand user needs before design decisions. Evidence: andrerowe.com/loql.html

EDUCATION

M.S. Cybersecurity and Information Assurance | Western Governors University *In progress (started Oct 2026), expected 2027*
CompTIA CySA+ and PenTest+: in progress (WGU M.S. program).

B.S. Computer Science | Southern New Hampshire University 2026

- **MAT-350 Applied Linear Algebra (A):** Image compression analysis and written recommendation report.
- **CS-499 Capstone:** Modernized a Java application into a Django web application with user authentication.
- **CS-340 Client/Server Development (A-):** Python CRUD module over 5,000+ MongoDB records with a dashboard. Evidence: andrerowe.com/grazioso-animal-rescue.html

RECOMMENDATIONS

"His ideas simplified the experience for the users while hitting all the business goals."
Ruhee Charania, Product Designer II, SpotHero (Pitch teammate, 2022)

"Andre was always a great student to work with, and his follow-through with suggestions or advice was outstanding. Communication is such a key skill in today's world, and Andre excels at it."
Darren Brown, Academic Advisor, Southern New Hampshire University

"His pseudocode was organized into clear, readable sections that covered every requirement, his C++ code was well commented, and his approach to choosing the right algorithms and data structures was sound."
Dr. Sherri Maciosek, Information Systems Adjunct Faculty, SNHU (CS-300 instructor)
