

ANDRE ROWE

Identity and Access Management Analyst | Active Directory Accounts and Group Membership | Healthcare

Brooklyn, NY (open to relocation) | 516-968-1816 | rowea190@gmail.com

andrerowe.com | linkedin.com/in/rowecreates | github.com/andre-rowe

PROFILE

Service Desk Analyst from a HIPAA-regulated hospital system who treated every device handoff as an access check. On a 1,000-endpoint Windows 11 migration program across 9 sites, confirmed each user's sign-in, mapped drives, printers and departmental applications before handoff, handled Active Directory account unlocks, password resets and group membership changes, and worked within an Intune- and Entra ID-managed endpoint environment. Built JWT-protected admin routes in course work. M.S. Cybersecurity and Information Assurance in progress.

Access validated at handoff | AD unlocks and password resets | Group membership changes | Approx. 65 cases a week

PROFESSIONAL EXPERIENCE

NYU Langone Health (contract via TEKsystems) | Service Desk Analyst | New York, NY

Jun 2025 to Aug 2025

Case study: Windows 10 end-of-support migration

Problem: Windows 10 end of support (October 14, 2025) would leave hospital endpoints without security patches.

Environment: HIPAA-regulated academic health system; clinical endpoint deployment across hospital, outpatient and specialty sites in Manhattan and Brooklyn.

Scale: Program scope: a 1,000-endpoint Windows 11 migration program across 9 sites, including Tisch Hospital, NYU Langone Orthopedic Hospital, One Park Avenue and NYU Langone Hospital, Brooklyn.

Individual volume: Staged 30+ devices a day and completed 10 to 15 on-site swaps a day on clinical units; handled approximately 65 ServiceNow cases a week.

Contribution:

- Treated each handoff as an access check: confirmed the right user could sign in and reach their mapped drives, printers and required departmental applications before the device was handed over.
- Handled Active Directory account unlocks, password resets and group membership changes during post-deployment support, and documented each case in ServiceNow without patient data.
- Used Intune and Entra ID as part of the Windows 11 deployment workflow and provisioned devices with Windows Autopilot, from Autopilot registration through Enrollment Status Page in staging to on-site swaps on clinical units.

Technologies: Windows 11, Windows Autopilot, Intune and Entra ID (used in the deployment workflow), BitLocker-enabled endpoints, Active Directory, ServiceNow, Wyse thin clients.

Outcome: Completed my assignment through its scheduled end. Before it ended, a manager on another NYU Langone team asked me to join his team on a new contract.

Evidence: andrerowe.com/windows11-migration.html (workflow diagram and reconstructed per-device checklist, fictional data)

DocGo | Field Supervisor, Medical Transport Operations | New York, NY

Aug 2023 to Mar 2025

- Supervised crews from a rotating roster of 60+ staff in a 24/7 medical transport operation running about 60 to 80 crews per shift.
- Owned scheduling, dispatch coordination and escalations.

Assist Ambulance | Emergency Logistics and Dispatch | New York, NY

Jul 2022 to Aug 2023

- Dispatched crews for time-critical calls under established protocols.
- Prioritized by urgency from incomplete caller and facility information.

SKILLS AND EVIDENCE

Active Directory: account unlocks, password resets and group membership changes [Work: Windows 11 case study]

Access validation at handoff: sign-in, mapped drives, printers, departmental applications [Work: reconstructed checklist]

Microsoft Entra ID and Intune: used as part of the Windows 11 deployment workflow [Work: Windows 11 case study]

Admin access control: JWT-protected admin routes in a MEAN application [Course CS-465: TravlR]

Authentication: user authentication in a Django modernization [Course CS-499]

ServiceNow: approximately 65 cases a week; no patient data in notes [Work: Windows 11 case study]

Regulated environment: daily work in HIPAA-regulated clinical areas [Work: Windows 11 case study]

Data handling: CRUD module over 5,000+ MongoDB records [Course CS-340]

Languages: Python, Java, JavaScript (course and project work)

PROJECTS

TravlR Getaways: admin access control in a full-stack app | *Academic project, CS-465* | *MEAN stack, JWT*

MEAN application with JWT-protected admin routes, so only authorized admin users can change site data. **Evidence:**
andrerowe.com/travl-r-getaways.html

EDUCATION

M.S. Cybersecurity and Information Assurance | Western Governors University *In progress (started Oct 2026), expected 2027*
CompTIA CySA+ and PenTest+: in progress (WGU M.S. program).

B.S. Computer Science | Southern New Hampshire University 2026

- **CS-499 Capstone:** Modernized a Java application into a Django web application with user authentication.
- **CS-340 Client/Server Development (A-):** Python CRUD module over 5,000+ MongoDB records with a dashboard. **Evidence:**
andrerowe.com/grazioso-animal-rescue.html
- **CS-300 Data Structures and Algorithms (A):** C++ binary search tree course planner with a two-pass CSV loader. **Evidence:**
github.com/andre-rowe/CS300-Portfolio

RECOMMENDATIONS

"Andre was always a great student to work with, and his follow-through with suggestions or advice was outstanding. Communication is such a key skill in today's world, and Andre excels at it."

Darren Brown, Academic Advisor, Southern New Hampshire University

"His pseudocode was organized into clear, readable sections that covered every requirement, his C++ code was well commented, and his approach to choosing the right algorithms and data structures was sound."

Dr. Sherri Maciosek, Information Systems Adjunct Faculty, SNHU (CS-300 instructor)

"His ideas simplified the experience for the users while hitting all the business goals."

Ruhee Charania, Product Designer II, SpotHero (Pitch teammate, 2022)
