

ANDRE ROWE

Technical Operations | 24/7 Operations, Escalations and Dispatch | Healthcare IT

Brooklyn, NY (open to relocation) | 516-968-1816 | rowea190@gmail.com

andrerowe.com | linkedin.com/in/rowecreates | github.com/andre-rowe

PROFILE

Field supervisor and dispatcher turned IT analyst. At DocGo, supervised field crews from a rotating roster of 60+ staff in a 24/7 medical transport operation running about 60 to 80 crews per shift, and owned scheduling, dispatch coordination and escalations, after dispatching time-critical calls at Assist Ambulance and taking 911 calls in Houston. At NYU Langone Health, handled approximately 65 ServiceNow cases a week on a 1,000-endpoint Windows 11 migration program across 9 sites.

24/7 operation, 60 to 80 crews a shift | Rotating roster of 60+ staff | Escalations and dispatch | Approx. 65 cases a week

PROFESSIONAL EXPERIENCE

NYU Langone Health (contract via TEKsystems) | Service Desk Analyst | New York, NY

Jun 2025 to Aug 2025

Case study: Windows 10 end-of-support migration

Problem: Windows 10 end of support (October 14, 2025) would leave hospital endpoints without security patches.

Environment: HIPAA-regulated academic health system; clinical endpoint deployment across hospital, outpatient and specialty sites in Manhattan and Brooklyn.

Scale: Program scope: a 1,000-endpoint Windows 11 migration program across 9 sites, including Tisch Hospital, NYU Langone Orthopedic Hospital, One Park Avenue and NYU Langone Hospital, Brooklyn.

Individual volume: Staged 30+ devices a day and completed 10 to 15 on-site swaps a day on clinical units; handled approximately 65 ServiceNow cases a week.

Contribution:

- Worked a daily rhythm of staging-room throughput and on-site swaps on clinical units, timed to avoid patient care, and coordinated Windows 11 migrations that could be completed remotely.
- Validated sign-in, mapped drives, printers and departmental applications before handoff; confirmed each user could work.
- Worked post-deployment cases in ServiceNow and handled Active Directory account unlocks, password resets and group membership changes, inside an Intune- and Entra ID-managed endpoint environment.

Technologies: Windows 11, Windows Autopilot, Intune and Entra ID (used in the deployment workflow), BitLocker-enabled endpoints, Active Directory, ServiceNow, Wyse thin clients.

Outcome: Completed my assignment through its scheduled end. Before it ended, a manager on another NYU Langone team asked me to join his team on a new contract.

Evidence: andrerowe.com/windows11-migration.html (workflow diagram and reconstructed per-device checklist, fictional data)

DocGo | Field Supervisor, Medical Transport Operations | New York, NY

Aug 2023 to Mar 2025

- Supervised crews from a rotating roster of 60+ staff in a 24/7 medical transport operation running about 60 to 80 crews per shift.
- Owned scheduling, dispatch coordination and escalations.

Assist Ambulance | Emergency Logistics and Dispatch | New York, NY

Jul 2022 to Aug 2023

- Dispatched crews for time-critical calls under established protocols.
- Prioritized by urgency from incomplete caller and facility information.

Earlier: 911 Call Taker, Houston Emergency Center; Emergency Medical Technician. The through-line is triage: deciding quickly, from partial information, what gets escalated.

SKILLS AND EVIDENCE

24/7 operations: round-the-clock medical transport operation running about 60 to 80 crews per shift [Work: DocGo]

Crew supervision: field crews from a rotating roster of 60+ staff [Work: DocGo]

Dispatch and escalation: scheduling, dispatch coordination, escalations; urgency-based dispatch [Work: DocGo; Assist]

Triage from partial information: 911 call taking; incomplete caller and facility information [Work: employment history]

Endpoint operations: 30+ devices staged a day; 10 to 15 on-site swaps a day; approximately 65 ServiceNow cases a week [Work: Windows 11 case study]

ITSM: ServiceNow cases; handled Active Directory account unlocks, password resets and group membership changes [Work: Windows 11 case study]

Monitoring pipeline: scheduled sensor ingestion and severity-graded alerts [Project: Bayou Alert]

Languages: Python, Java, C++, JavaScript (course and project work)

PROJECTS

Bayou Alert: flood-warning monitoring dashboard | *Independent project* | Azure Functions, Cosmos DB, React, Mapbox

Owned the backend and cloud architecture: a scheduled Azure Function pulls live USGS flood-sensor data into Cosmos DB, and a React and Mapbox dashboard shows severity-graded alerts across Houston's bayou network. Evidence: andrerowe.com/bayou-alert.html

EDUCATION

M.S. Cybersecurity and Information Assurance | Western Governors University *In progress (started Oct 2026), expected 2027*
CompTIA CySA+ and PenTest+: in progress (WGU M.S. program).

B.S. Computer Science | Southern New Hampshire University 2026

- **CS-300 Data Structures and Algorithms (A):** C++ binary search tree course planner with a two-pass CSV loader. Evidence: github.com/andre-rowe/CS300-Portfolio
- **CS-340 Client/Server Development (A-):** Python CRUD module over 5,000+ MongoDB records with a dashboard. Evidence: andrerowe.com/grazioso-animal-rescue.html
- **MAT-350 Applied Linear Algebra (A):** Image compression analysis and written recommendation report.

RECOMMENDATIONS

"Andre was always a great student to work with, and his follow-through with suggestions or advice was outstanding. Communication is such a key skill in today's world, and Andre excels at it."

Darren Brown, Academic Advisor, Southern New Hampshire University

"His pseudocode was organized into clear, readable sections that covered every requirement, his C++ code was well commented, and his approach to choosing the right algorithms and data structures was sound."

Dr. Sherri Maciosek, Information Systems Adjunct Faculty, SNHU (CS-300 instructor)

"His ideas simplified the experience for the users while hitting all the business goals."

Ruhee Charania, Product Designer II, SpotHero (Pitch teammate, 2022)
